

HELP THE LIONS DETECT VISION PROBLEMS IN THE CHILDREN OF NORTHEAST ARKANSAS

What Spot Sees

Spot is powered by sophisticated technology that quickly detects the indication of the following vision issues:

- Near-sightedness (myopia)
- Far-sightedness (hyperopia)
- Unequal refractive power (anisometropia)
- Blurred vision, eye structure problem (astigmatism)
- Pupil size deviations (anisocoria)
- Eye misalignment (strabismus)

In just seconds, Spot provides a comprehensive, reliable analysis that enables informed decision making about the need for follow-up diagnosis.

spot

VISION SCREENING

Spot it early, treat it early

Spot is a breakthrough device that quickly and easily detects vision issues across all age groups. Spot helps ensure children have an opportunity to reach their full potential.

Spot: what vision screening should be.

VISION SCREENING

A better way

About 80 percent of learning is acquired visually, yet as important as vision is, screening approaches are often inaccurate and cumbersome. Undetected vision disorders can significantly handicap a child's potential. Spot is a better way.

spot

VISION SCREENING

Designed to work as easily with toddlers as with teenagers, Spot provides reliable data in seconds. With Spot, educators, healthcare professionals, and charitable organizations can now confidently assess eyesight for all ages.
